Index to Volume 70, 2005

	Issue	Page
A brief history of seismic migration, J. Bee Bednar	3	3MJ
A constitutive equation and generalized Gassmann modulus for multimineral porous media, José M. Carcione, Hans B. Helle, Juan E. Santos, and Claudia L. Ravazzoli	2	N17
A fundamental limitation for the reconstruction of impedance profiles from seismic data, Florence Delprat-Jannaud and Patrick Lailly	1	R1
A moving hum filter to suppress rotor noise in high-resolution airborne magnetic data, Jianghai Xia, William E. Doll, Richard D. Miller, T. Jeffrey Gamey, and Abraham M. Emond	4	G69
A new iterative method for computing the magnetic field at high magnetic susceptibilities, Matthew B. J. Purss and James P. Cull	5	L53
A new methodology for the acquisition and processing of audio-magnetotelluric (AMT) data in the AMT dead band, Xavier García and Alan G. Jones	5	G119
A one-way dual-domain propagator for scalar qP-wave in VTI media, Qiyu Han and Ru Shan Wu	2	D9
A theoretical and experimental comparison of three-dimensional seismic reflection and offset vertical seismic profiling (VSP), Jamie P. Rich and Alan J. Witten	4	R25
A volumetric approach for the resistivity response of freshwater shaly sandstones, Olivar A. L. de Lima, Michael Ben Clennell, Geraldo Girão Nery, and Sri Niwas	1	F1
Acheron's rainbow: Free associations on 75 years of exploration geo-electromagnetics, Alan C. Tripp	6	25ND
Abdelrahman, El-Sayed M., Magnetic interpretation using a least-squares, depth-shape curves method	3	L23
Ackman, Terry, see Love, Erica	6	B73
Aiken, Carlos, see Hinze, William J.	4	J25
Al-anboori, Abdullah, Approximate separation of pure-mode and converted waves in 3-C reflection seismics by τ-p transform	3	V81
Al-Zayer, Ramzy M., Image gathers of SV-waves in homogeneous and factorized VTI media	5	D55
Amundsen, Lasse, Rough-sea deghosting of streamer seismic data using pressure gradient approximations	1	V1
Amundsen, Lasse, see Holvik, Egil	2	S43
Analysis of depth resolution in potential-field inversion, Maurizio Fedi, Per Christian Hansen, and Valeria Paoletti	6	A1
Analysis of the spectral hole in velocity versus depth resolution for reflection traveltimes with limited aperture, Kenneth P. Bube, Robert T. Langan, and Tamas Nemeth	3	U37
Analytic solution of ray-tracing equations for a linearly inhomogeneous and elliptically anisotropic velocity model, Yves Rogister and Michael A. Slawinski	5	D37
Ander, M. E., see Nabighian, M. N.	6	63ND
Andreassen, Karin, see Bünz, Stefan	5	B19
Acquisition and processing strategies for 3D georadar surveying a region characterized by rugged topography, Bjoern Heincke, Alan G. Green, Jan van der Kruk, and Heinrich Horstmeyer	6	K53
An analysis of 2D and 3D multiple attenuation for a canonical example, Luc T. Ikelle	6	A13
An experimental study of the time-domain electromagnetic response of a buried conductive plate, Mark E. Everett, Alfonso Benavides, and Carl J. Pierce	1	G1
Annan, A. Peter, see Smith, Richard S.	1	G29
Anno, Phil D., see Sinha, Satish	6	P19
Annual Meeting Selection Papers, Gérard C. Herman	4	3JA
Antileakage Fourier transform for seismic data regularization, Sheng Xu, Yu Zhang, Don Pham, and Gilles Lambaré	4	V87
Approximate apparent conductance (or conductivity) from the realizable moments of the impulse response, Richard S. Smith, Terry J. Lee, A. Peter Annan, and M. D. O'Connell	1	G29
Approximate separation of pure-mode and converted waves in 3-C reflection seismics by τ-p transform, Abdullah Al-anboori, Mirko van der Baan, and J. Michael Kendall	3	V81
Arcone, Steven A., see Nobes, David C.	1	K20
AVO for one- and two-fracture set models, He Chen, Raymon L. Brown, and John P. Castagna	2	C1
Backus, Milo M., see Zeng, Hongliu	3	C7
